CLARIFICATIONS

Question 1: Does NEORSD require applications for Construction Only projects to include completed engineering plans with a professional engineer stamp at the time of submission?

Answer 1: NEORSD will accept applications for Construction Only projects that do not include complete engineering plans at the time of submission of the application. If NEORSD awards funding to the Construction Only project, engineering plans stamped by a professional engineer have to be provided to NEORSD no later than Wednesday, 12/31/2025. If engineering plans with a professional engineer stamp are not received by this date, the award will be withdrawn.

Applications for Construction Only projects that include completed engineering plans with a professional engineer stamp and are ready to be competitively bid at the time the application is submitted will be awarded an additional five (5) points to the overall project score.

Question 2: Will the NEORSD require all agreements to begin on January 1, 2026.

Answer 2: No, at the request of an awardee an agreement can begin prior to the standard January 1, 2026, start date. This does not apply to Construction Only project awards that have not submitted plans with a professional engineer stamp.
