How your sewer charges are determined:

The Northeast Ohio Regional Sewer District calculates your quarterly sewer charges by multiplying your water consumption (measured in MCF) by the rate above. The \$5.85 base charge is then added to that total. *The charges above do not reflect local charges that may apply.*

We offer several cost-saving programs that may benefit you. Call your billing agent at the number on the back or visit neorsd.org/save

Charges reflect actual consumption. The 1 MCF minimum charge assessed in previous years has been eliminated.

* MCF = 1,000 cubic feet of water, or 7,480 gallons.

† Homestead or Affordability Program rate. See back for details.
