

**Northeast Ohio Regional Sewer District
2025 Member Community Infrastructure Program
Request for Proposals
March 2024**

Introduction

The Northeast Ohio Regional Sewer District (District) through the Member Community Infrastructure Program (MCIP) will fund local communities and other eligible political subdivisions that own, operate, and maintain public sewer infrastructure that is tributary to a District wastewater treatment plant to address water quality and quantity issues associated with sewer infrastructure that adversely impacts human health and the environment.

The District will provide funding for up to 75% of project costs. The MCIP funds will be provided by the District on a direct disbursement basis directly to the grantee based on MCIP project costs, conditioned on the District's prior approval of the design and/or construction of the project.

The District will determine the appropriate funding mechanism, grant, or community operating lease, during project evaluation. Determination of the funding mechanism for the project will be at the discretion of the District. Refer to the MCIP Policy for additional background and information on the funding mechanism.

As per the Code of Regulations of the District, [Title III Separate Sanitary Sewer Code](#), Chapter 8, a community must have an approved Water Quality Technical Support Program to be eligible for MCIP funding. However, for the 2025 MCIP funding year, communities will only be required to submit a Letter of Acknowledgement (Attachment A) with this year's proposal. For additional information on Title III requirements contact Jeff Jowett, Community Discharge Permit Program Manager Jowettj@neorsd.org.

Eligible Projects

Eligible projects include, but are not limited to the following:

- **Projects to Mitigate Sanitary Sewer Overflows (SSO) and Illicit Discharges:** Projects necessary to mitigate separate sanitary sewer overflows and illicit discharges.
- **Projects to Mitigate Infiltration & Inflow (I/I):** Projects necessary to address inflow and infiltration problems, including but not limited to, rehabilitation or separation of common trench pipes and manholes, removal of direct inflow connections, repair, or replacement of cracked or exfiltrating combined, sanitary or storm sewers, and reduction of public and private sources of I/I.
- **Projects to Remove/Eliminate Failing Home Sewage Treatment Systems (HSTS):** Projects to construct new separate sanitary sewers to eliminate failing HSTSs. HSTS failure should be confirmed by the jurisdictional Board of Health.

- **Projects that Improve Local Sewer System Level of Service:** Projects that reduce local sewer flooding and backups in the local system that can be attributed to undersized or structurally deficient local sewers. Such projects include efforts to address basement flooding in separate and combined sewer systems, and to the extent practical, on-site stormwater management practices to mitigate the increase in downstream flows.
- **Projects to Manage Stormwater Flow that Improve Combined/Sanitary Level of Service:** Projects that reduce volume, flow rate, or pollutant load of stormwater to a combined sewer, separate storm sewer, and/or directly to receiving water body that improve a combined or sanitary sewer level of service.
- **Projects that Separate Over/Under Sewers:** Complete separation of common trench over/under sewers, with new infrastructure to transport storm and/or sanitary flows.

To ensure project eligibility, communities should schedule a pre-proposal meeting prior to submitting a proposal. Details on scheduling a pre-proposal meeting are found under the Pre-Proposal Meeting section of this document.

Ineligible Projects

MCIP funds should not be used for any project that causes, accelerates, or contributes to water quality degradation or water quantity issues that increase flooding, erosion, or is otherwise detrimental to human health within the District's service area. Ineligible projects include, but are not limited to the following:

- The proposal of fill materials in floodplains, riparian areas or wetlands, and the culverting or channelizing of watercourses;
- Capital, operation, maintenance, and administrative expenses not directly related to an eligible project; and
- Projects that increase the potential for flooding within a community and/or neighboring community's combined, sanitary, or storm sewer systems or local watercourses. The applicant is responsible for evaluating any potential downstream or upstream impacts of the proposed work on other users, or on the level of service of the infrastructure.

Project Requirements

To be considered for funding, projects at a minimum must meet the following requirements:

- Reduce water quantity issues and/or address water quality issues that impact human health and the environment associated with combined or separate sanitary infrastructure problems, as determined by the applicant or the District.
- Be located in the District's sanitary sewer service area (<http://arcg.is/2bPxzEt>).
- Meet all applicable District, federal, state, and local regulations.
- Design-only projects must complete design within 12 months of MCIP Project Agreement start.

- Construction-only projects must include professional engineer stamped design drawings at the time of application, and construction activity must be complete within 12 months of a signed MCIP Project Agreement.
- Include at least 25% non-District matching funds dedicated to the project. These funds may include cash and/or in-kind sources. For example, costs associated with road rehabilitation in which MCIP funding is proposed for sanitary or combined sewer replacement or rehabilitation may be captured as non-District matching funds. Community Cost Share (CCS) may be used in accordance with CCS policy as community match. In addition, the following project costs may be captured to meet this 25% non-District matching fund requirement:
 - Personnel: Fully-loaded labor costs for employees of the community related to the direct performance of engineering and design, construction services, project management, and performance verification on the project.
 - Planning and design costs directly related to the project that were incurred prior to the submittal of a project proposal that have a material benefit to the proposal. These costs include, but are not limited to CCTV costs, manhole inspection costs, pre- construction performance verification activities (i.e. flow monitoring, water quality sampling), and engineering services such as surveying, design engineering, and cost estimating. Itemization and documented proof of these costs is required to be submitted with the proposal for consideration.

All funds must be approved as eligible by the District for the 25% non-District match requirement. Funds acquired from previous District awards cannot be used as match. Communities should contact the District's Grant Programs Administrator to assess if the funding source is eligible.

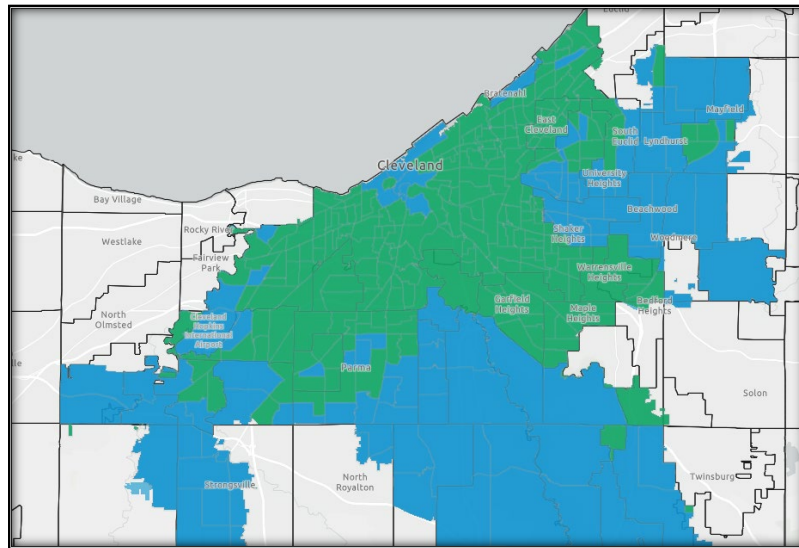

The District, at its sole discretion, may waive the 25% requirement for a community identified by the Office of the Auditor of the State of Ohio as being a local government in fiscal distress. This includes a community in fiscal caution, watch, or emergency as defined by the Office of the Auditor of the State of Ohio (<https://ohio.auditor.gov/fiscal/local.html>).

Equity Investment Focus Areas

The District will designate separate funding for the award of projects within Equity Investment Focus Areas (EIFA). For the purposes of this RFP, EIFA is defined as those areas within the District's sanitary sewer service area that are included in a census tract with high poverty levels. Households earning less than 250% of the Federal Poverty Level (FPL) are eligible for the District's Affordability Program. This criterion (FPL) is based on 2021 Census Data regarding Median Household Income and Average Household Size.

A 25% match is still required for projects within an Equity Investment Focus Area. A map delineating the EIFA can be viewed at the following link: <https://arcg.is/0e5v15> or in **Figure 1** below.

Figure 1: Equity Investment Focus Area (in green)

Terms of Grant Funding

The MCIP is a direct disbursement grant and payment will be made only on project-specific invoices as referenced in the approved project budget accrued on or after January 1, 2025. If the project for which you are applying is part of a larger construction project, the District will require individual, itemized, and verified invoices to support direct disbursement. Refer to the District's *MCIP Policy, Process, and Procedures* document for additional information on direct disbursement.

Costs associated with services provided by third-parties towards the project, including technical services such as engineering and design, construction services, project management, performance verification, testing, and inspection, and/or other direct costs as approved by the District, are eligible for grant funding. Indirect cost allocations are not eligible for grant funding.

Project Performance Verification

The District will require project performance verification to demonstrate how the project is functioning. Verification activities and data collection may include reporting, pre- construction rainfall and flow monitoring, water quality sampling, and modeling or other type of evaluation, such as Rainfall Derived Inflow and Infiltration (RDII) determination depending on the type of project.

For projects that address I/I reduction or elimination, communities will only be responsible for pre-construction flow monitoring (which can also be completed as part of design), as opposed to both pre- and post-construction. Performance Verification Guidelines on the type of pre and/or post construction monitoring, sampling and evaluation are provided at:

[Performance Verification Technical Guidance](#)

Communities should review the guidelines and include their anticipated method(s) of data collection, project verification and the estimated associated costs in their proposal. It is the applicant's responsibility to ensure that no negative impacts will occur as a result of the proposed project through investigations, modeling, or other analysis.

Project Evaluation

The District will review and prioritize proposed projects for available funding based on the following criteria:

1. Infrastructure Condition (25%)

The current and actual condition of the structure using the condition descriptions defined in **Table 1**. Information that expands on the description should be provided with the proposal to assist with the scoring of this category. This may include but is not limited to condition assessments, identification of broken pipes, televised underground system inspection reports, age inventory reports and maintenance records, and any additional information that may impact the evaluation of the infrastructure condition. If available, condition assessments should be provided in accordance with NASSCO's Pipeline and Manhole Assessment and Certification Program (PACP and MACP). NASSCO condition is recommended. Only provide a high-level summary spreadsheet that details the sewer system's condition. If available, please provide photo or video proof of major defects with detailed documentation indicating defect(s).

Due to deficiencies commonly experienced with Over/Under sewer configurations (deteriorating, leaky, contribute high I/I and are difficult to maintain), Over/Under systems will automatically be scored 25 points in the Infrastructure Condition category.

Table 1. Rating System for Structural Infrastructure Condition

Condition Rating	Description	Score
Failed	Complete reconstruction needed – existing infrastructure is failed, in the Over/Under configuration, and/or a PACP/MACP structural condition scores of 5.	25
Critical	Major reconstruction needed to maintain integrity, and/or PACP/MACP structural condition scores between 4-5.	20
Poor	Partial reconstruction or extensive rehabilitation required to maintain integrity, and/or PACP/MACP structural condition scores between 3-4.	15
Fair	Major rehabilitation needed to maintain integrity, and/or a PACP/MACP structural condition scores between 2-3.	10
Good	Routine maintenance and periodic repairs required to maintain integrity, and/or a PACP/MACP structural condition scores between 1-2.	5

Note: To validate condition rating, photo/video evidence or a structural PACP/MACP report must be submitted.

For projects where the infrastructure condition is unknown, the infrastructure condition will be assessed and scored based on age and/or common trench configuration, using **Table 2**. Trench type can be verified through photo documentation, Local Sewer System Evaluation Study report(s), or as-built drawings detailing the configuration. Applications should include documentation verifying the age of infrastructure, as well as any additional qualitative or historical information that can confirm the current condition.

Table 2. Rating System for Unknown Structural Infrastructure Condition

Condition Rating	Description	Score
Failed	50 years or older, and/or an Over/Under configuration	25

Poor	30-39 years and/or common trench	15
Fair	20-29 years and/or common trench	10
New/Good	0-19 years	5

For projects proposing to remove/eliminate failing HSTSs, the infrastructure condition will be assessed using **Table 3**. Information that expands on the description should be provided with the proposal to assist with the scoring of this category.

- How many verified homes, businesses, or other occupied structures will see a benefit from this project?
- How will the proposed project eliminate or reduce the water quality/quantity impact?
- How will the proposed project mitigate the potential for unregulated release of sewage to the environment.

Information that verifies and quantifies the water quality and quantity issues should be provided with the proposal and appropriately referenced within the response (e.g., page or document reference). Examples of project type and corresponding, supporting evidence include but are not limited to the following:

- HSTS /Illicit Discharge Elimination
 - Findings & Orders or Public Nuisance issued (e.g. Board of Health, Ohio EPA)
 - Sampling data supporting water quality deficiency issues (e.g. *E. Coli*, Pollutant Load)

3. Project Provides Source Control of Stormwater (10%)

Project demonstrates source control of stormwater by preventing (removal) or controlling (detention/retention) stormwater from entering the combined or separate sanitary sewer system. To be considered for points under this criterion, the applicant will have to show volume reduction and/or peak rate control of stormwater entering the combined or separate sanitary sewer system using stormwater control measures such as disconnection, detention, or other innovative practices; see **Table 5** and **Attachment B**. Bonus points are available for projects that are in an identified excessive I/I area as defined in table.

Table 5. Rating System for Source Control of Stormwater

Description	Score
Removal of stormwater from combined or sanitary sewer system and managed for quality and/or quantity. This can be accomplished by a single SCM that provides a dual function (<i>ex. retention basin with critical storm and wet extended detention</i>), or by one or more SCMs that provide independent functions (<i>ex: infiltration, harvesting, impervious area reduction, critical storm, WQv treatment</i>).	9-10
Control of stormwater prior to discharging into the combined or sanitary sewer system via a SCM that provides a quantity management function via runoff reduction or peak rate control (<i>ex: infiltration, harvesting, impervious area reduction, critical storm</i>).	6 - 8
Removal of stormwater from the combined or sanitary sewer system.	5
BONUS: Project is in an identified excessive I/I area as defined by the Community Discharge Permit; an area having a 5-year, 1-hour peak flow rate greater than 20,000 gallons per acre per day (gpad) and causing local or downstream issues or any peak flows greater than 35,000 gpad. Provide the source of I/I data (LSSES or other study).	2

4. Project Provides a Significant Benefit to the District (15%)

Demonstrate the benefits to the District of the project. Benefits include but are not limited to projects that assist in attaining compliance with a District community discharge permit, addresses private property flows to District collection system infrastructure, reduce infrastructure flooding/basement back-ups, expand water quality treatment benefit to new District customers, are recommended by a District study, and/or improve water quality in area waterways to compliment the District's ongoing programs, such as the Project Clean Lake Program, Local Sewer System Evaluation Studies, or Regional Stormwater Management Program.

5. Non-District Matching Funding (10%)

One point will be provided for meeting the minimum requirement of 25% non-District matching funds; see **Table 6**. If the District waives this for a community in fiscal distress as discussed under the Project Requirements section in the Request for Proposals, the proposal will be awarded one point. Projects within Equity Investment Focus Areas (EIFA) are required to provide only a 25% match and will be scored and awarded independently from other projects outside of the EIFA. Proposals for projects within EIFAs that choose to provide greater than the 25% minimum required matching funds will not receive additional points under the Non-District Matching Funding scoring category. Proposals must provide documentation of funding sources.

Table 6. Non-District Project Match Scoring

% Match	Point Score
25	1
26-28	2
29-31	3
32-34	4
35-37	5
38-40	6
41-43	7
44-47	8
48-49	9
50-99	10

6. Design Complete (5 extra points)

Five extra points will be added to the overall project score if the design is complete (professional engineer stamp) and ready for bidding at the time of proposal submission due date.

7. Intercommunity Projects (5 extra points)

Up to five extra points will be added to the overall project score if the project assists in conserving sewer capacity, addressing water quality concerns at a specific outfall of a downstream community, or a downstream community is able to remove additional flows from an upstream community. The community should reference District Local Sewer System Evaluation Study findings or other data including certification from the benefiting community.

Stormwater Control Measure Guidance

Stormwater Control Measure Examples per Function

Stormwater infiltration is the process by which rainfall and stormwater runoff flows into and through the subsurface soil. Stormwater infiltration occurs when rainfall lands on pervious surfaces, when runoff flows across pervious surfaces, and when runoff is collected and directed to an infiltrating stormwater control measure (SCM).

Rainwater harvesting is the practice of collecting and storing rain for reuse, rather than letting the water be channeled into drains, streams, or rivers. To truly be effective, there must be a dedicated need for the harvested rainwater to ensure the storage vessels are consistently emptied and that storage volumes are available to collect and hold the next rain event.

Impervious area reduction is the practice of converting impervious areas (e.g., rooftops & parking lots) into pervious surfaces (e.g., natural vegetation, permeable pavers, green roofs, etc.). This can also be accomplished by disconnecting and conveying impervious surfaces and roof drains to suitable pervious areas.

Peak Rate Control for stormwater runoff (i.e., Critical Storm) is the process of reducing the post-dvl'p peak runoff rate from the critical storm (CS) & all more-frequent storms to the pre-dvl'p peak runoff rate from a 1-yr, 24-hr storm. Storms less frequent than the CS (up to the 100-yr) have peak runoff rates \leq peak runoff rates from equivalent size storms under pre-dvl'p conditions.

Water Quality Volume (WQv) Treatment is accomplished in Ohio via designing post-construction SCMs that store storm water runoff (from developed areas) from rainfall events $\leq 0.90''$ (estimated 80% reduction in total suspended solids on an average annual basis). Ohio EPA feels this precipitation depth will adequately control pollutants in runoff and minimize channel & bank erosion.

Under no circumstance, shall the District be responsible for payment of any costs that, in aggregate, exceed the amount of the District Funds, including, but not limited to, differing site conditions or other unforeseen situations.

- 4.2.2. Prior to the Member Community issuing a notice-to-proceed for any MCIP Project related work or service, the Member Community shall provide the District a copy of the certification by the Member Community's Finance Director that the Member Community Funds have been lawfully appropriated by the Member Community for the Project. The Member Community understands, and agrees, that the PRAV document may only be signed by a duly authorized representative of the Member Community and that signature of the PRAV by such representative shall be an affirmative representation of the Member Community that the Member Community has verified the accuracy of the consultant and contractor invoice, that the consultant's and contractor's services were furnished and performed in accordance with the conditions of the contract for the work and performed to the satisfaction of the Member Community, that the consultant and the

contractor invoice is not in dispute by either the Member Community or its consultant/contractor, that the Member Community's representative recommends payment, and that the Member Community shall pay the consultant and the contractor as expeditiously as possible and consistent with Member Community's policies following receipt of approved funds from the District and within the time period prescribed in Member Community's contract with the consultant and the contractor to avoid any late fees or other penalties for late payment. The absence of written inquiry or objection of an invoice within the 45-day period shall not be deemed approval of the invoice by the District. Notwithstanding anything to the contrary in this Agreement, the District shall not pay any Project costs until such work is completed and accepted by the District as satisfactory, which acceptance shall not be unreasonably withheld, conditioned or delayed.
- 4.3.4. All invoicing shall be in accordance with an agreed-upon format between the District and the Member Community that is sufficient to allow the District to review, inspect and approve the services provided for the Project. The Member Community shall submit proof of payment to its consultant and contractors within forty-five (45) days of the District's payment to the Member Community. Should the Member Community fail to submit such proof within forty-five (45) days, the District shall have the right to withhold future payment(s) to the Member Community until such time that the Member Community provides proof of payment of MCIP funds to the consultant and the contractor, and any failure of the Member Community to comply

with the material payment requirements in this Agreement may be considered a material breach of this Agreement and be cause for termination of the Agreement, in addition to any other remedies available to the District.

- 4.3.5. All requests for payment of District Funds for project management, design services, and construction shall be documented to the District in reasonable satisfaction based on the agreed-upon scope and fee for such services.
