

COLOR ME CLEAN

IN ONE YEAR, THE NORTHEAST OHIO REGIONAL SEWER DISTRICT TREATS ABOUT **90 BILLION** GALLONS OF WATER. IF YOU POURED THAT MUCH WATER INTO ONE-GALLON BUCKETS, THEY WOULD CIRCLE THE EARTH'S 24,902-MILE EQUATOR MORE THAN **340** TIMES!

DO THE MATH! $(6"/1 \text{ GAL}) \times (90 \text{ BILLION GAL.}) \times (1'/12") \times (1 \text{ TIME}/24,902 \text{ MI.}) \times (1 \text{ MI.}/5,280') = 342.25$
