

## Molecule Homework

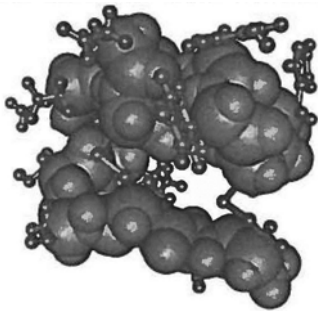

Surface molecules are only attracted inwards towards the bulk molecules.

What are the definitions for the following words as a solid>gas or liquid >gas or solid>liquid or liquid>solid?

- Sublimation
- Vaporization
- Melting or fusion
- Deposition
- Condensation
- Freezing

## Proteins and the Body's Worker Molecules

While millions of chemicals and compounds participate in the various physiological processes within the body, most of the biologically essential molecules and chemicals that compose cells in the human body or the 'molecules of life' fall within four categories – proteins, carbohydrates, lipids and nucleic acids.

Homework Question:

How do molecules function and structure of proteins within our bodies?

Example: Blood – The hemoglobin protein carries oxygen in your blood to every part of your body...
